# Aircraft Enrollment Services

Accurate and Timely Aircraft Setup Services for
ATP Maintenance Tracking

## ABOUT ATP

ATP is the general aviation maintenance industry's premier provider of content management and services, enhancing businesses maintenance operations—from maintenance and compliance tracking to inventory management—to improve productivity, compliance and safety.

By integrating regulatory and technical content with maintenance activities, ATP provides easy access to the broadest set of critical information available from one source, streamlining operations and maximizing aircraft uptime.

**KNOWLEDGE FUELS SAFETY®**

Get a jump start on maintenance tracking and forecasting for your aircraft with ATP's affordable Aircraft Enrollment Services. We enable your transition from paper or spreadsheets to a fully digital maintenance tracking and forecasting solution that will save you time, reduce costs and increase aircraft utilization and value.

With ATP's Aircraft Enrollment Services, you get a dedicated, expert analyst who will collaborate with your team to setup aircraft profiles and accurately enter current maintenance and compliance information. When complete, we generate the due list and train your employees to use the system.

You can be confident in ATP's process because our information experts work closely with you to assure accuracy. Our team of IAs and Aviation Information Specialists have extensive experience working with the world's largest aircraft manufacturers and maintenance operations to manage complex aviation data. We double-monitor data entry and validate information to eliminate errors and provide faster turnarounds. The steps we take include:

- Review your current aircraft maintenance data
- Enter your current data into the ATP Maintenance Tracking system
- Generate your aircraft maintenance due list
- Validate the due list to assure accuracy
- Train your employees

We all recognize that aviation maintenance is an information intensive business, and a considerable amount of time is spent on non-core tasks, such as data entry and managing paper and spreadsheets. ATP's Aircraft Enrollment Services and the cloud-based ATP Maintenance Tracking service bring aircraft maintenance to a new level. You will have more time to focus on your core job and grow your business.

# ATP® Maintenance Tracking

ATP Maintenance Tracking coordinates with your ATP Libraries to build a comprehensive list of Airworthiness Directives (ADs), Service Bulletins (SBs) and maintenance events for tracking and forecasting required maintenance.

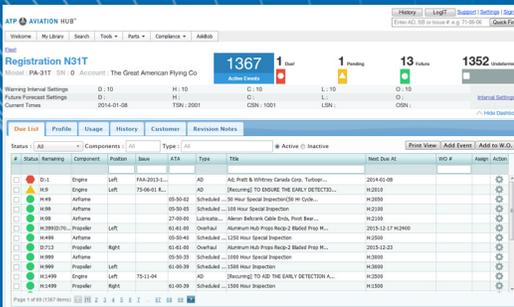

## The Fleet Dashboard gives you the status of your fleet at a glance.

- Calculate maintenance tasks based on current flight times
- Track compliance with ADs and SBs in your ATP® Libraries
- Advanced filters let you choose what information is visible
- Set permissions to control who can access each aircraft

## Due Lists calculate maintenance tasks to be completed now, and in the future, based on current flight times.

- Filter due limits and events by time, cycles, landings or other values to view only the events you need
- List all events by ATA code
- Easily view the most urgent events across the whole aircraft

## Aircraft Profiles include airframe, engine, propeller, and components.

- Quickly build a complete profile of all components on the aircraft and track start times for each component
- Track current times for each component with option to update components with latest flight times
- Track warranty information for each part
- Track location of components on the aircraft

Contact us today to learn how ATP Maintenance Tracking simplifies the steps necessary to complete maintenance.
